Opening a new Shopping Mall  
in Delhi, India

By- Avanendra Pratap Singh  
July 2020

# Business Problem

- ❑ Location of the shopping mall is one of the most important decisions that determines whether the mall will be success or a failure.
- ❑ Objective: To analyze and select the best locations in the city of Delhi, India to open a new shopping mall.
- ❑ This project is timely as the city is currently suffering from the oversupply of Shopping malls.
- ❑ Business question- In the city of Delhi, India , if a property developer is looking to open a new shopping mall where would you recommend that they open it?

# Data

## Data required

- List of the neighborhoods in Delhi city.
- Latitude and Longitude coordinates of the neighborhoods.
- Venue data particularly data related to shopping malls

## Sources of data

- Wikipedia page for the neighborhoods

[https://en.wikipedia.org/wiki/Category:Neighbourhoods\\_in\\_Delhi](https://en.wikipedia.org/wiki/Category:Neighbourhoods_in_Delhi)

- Geocoder package for Latitude and Longitude coordinates.
- Foursquare API for venue data.

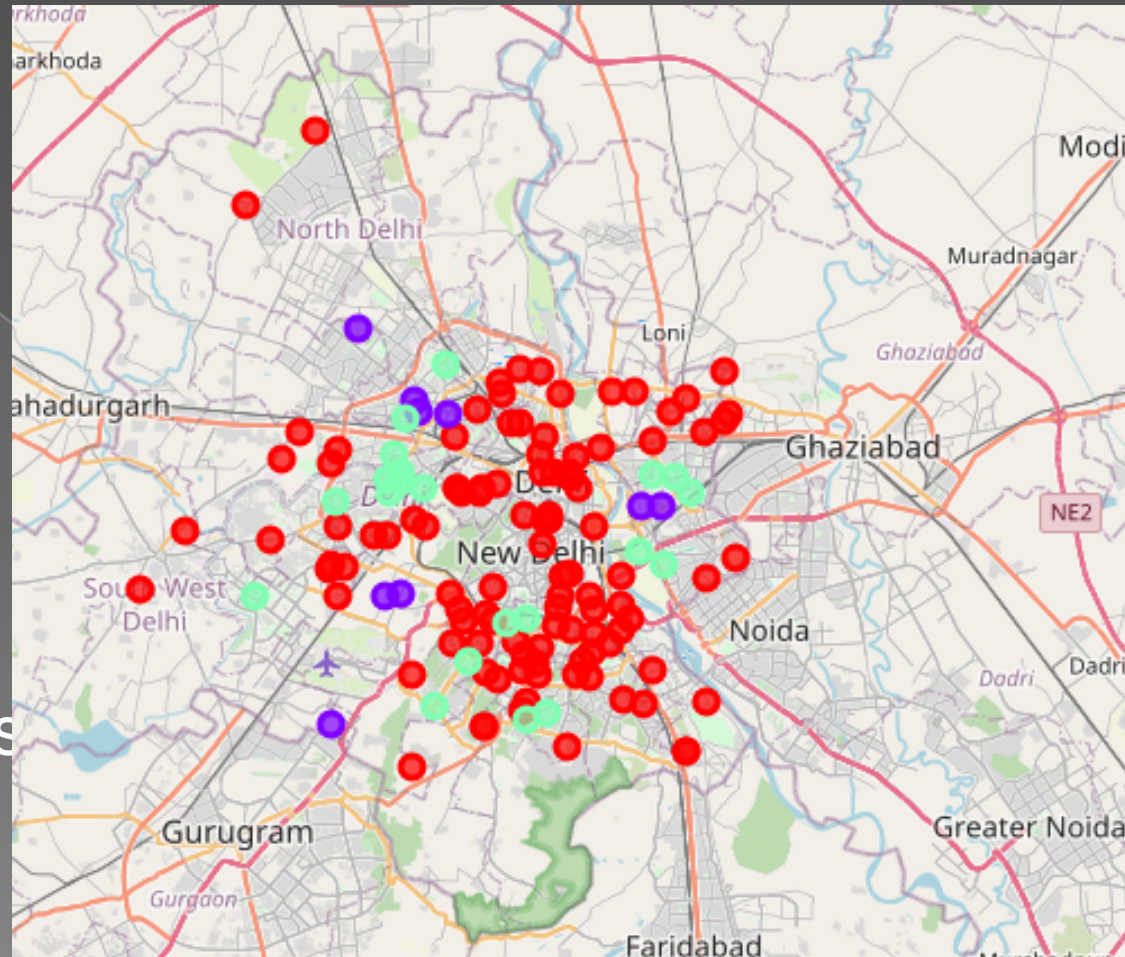

# Methodology

- ❑ Web scrapping Wikipedia page for neighborhoods list.
- ❑ Get latitude and longitude coordinates using Geocoder.
- ❑ Use Foursquare API to get venue data
- ❑ Group data by neighborhoods and taking the mean of the occurrence of each venue category
- ❑ Filter venue category by Shopping mall.
- ❑ Perform clustering on the data by using k-means clustering
- ❑ Visualize the clusters in a map using Folium

# Results

Categorized the neighborhoods into 3 clusters:-

- ▶ Cluster 0: Neighborhoods with moderate number of shopping malls
- ▶ Cluster 1: Neighborhoods with low number to no existence of shopping malls
- ▶ Cluster 2: Neighborhoods with high number of shopping malls

Map of Delhi with clustered neighborhoods

# Discussion

- ❑ Most of the shopping malls are concentrated in the central area of the city.
- ❑ Highest number in cluster 2 and moderate number in cluster 0.
- ❑ Cluster 1 has very low number to no shopping mall in the neighborhoods.
- ❑ Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls

# Recommendations

- ❑ Open new shopping malls in neighborhoods in cluster 1 with little to no competition .
- ❑ Can also open in neighborhoods in cluster 0 with moderate competition if investors have unique selling propositions to stand out from the competition.
- ❑ Avoid neighborhoods in cluster 2, already high concentration of shopping malls and intense competition.

# Conclusion

- ❑ **Answer to the business question:** The neighborhoods in cluster 1 are the most preferred locations to open a new shopping mall.
- ❑ Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

Thank You
